

Egyptian Oils of Enlightenment

If your selection is not available in this shipment we will order it from Egypt and it should be delivered to you, after Almine has blessed it and created its sigil, within a few weeks.

The Properties of the Alchemical Fragrant Oils

Although each individual bottle of oil will have a sigil to enhance specific properties in that particular bottle, the fragrances themselves have specific emphasis of qualities.

The affects of fragrant oils are different than the therapeutic oils recommended for physical ailments (available through our office).

The fragrances bring out emotional and spiritual wholeness, and can be used as after-shave, perfume, deodorant and as a daily anointing of the body. They can keep their potency for years and will only get better when stored on their laminated sigil.

Women's fragrances:

1. Lotus - This fragrance creates a very profound awakening in the hidden centers of the body, specifically the pineal and the high-heart. It creates a field of golden light around the body.
2. Magnolia - Magnolia heals issues of mothering, either the inclination to mother others, or neediness caused by insufficient parenting during childhood. Magnolia brings deep contentment and feelings of wholeness and eliminates discontent.
3. Lily - Lily creates refinement of enjoyment and depth of sensual experience.
4. Jasmine - Jasmine brings intensity to sensual experience. It heightens awareness of the pleasures of life and restores emotional well-being.
5. The Secret of the Desert (Blend) - Grounding for women who are inclined to live outside their bodies, or who suppress their feminine in favor of masculine expression. It creates a feeling of safe feminine expression.
6. Narcissus - Can be called the fragrance of the moon, emphasizing the feminine mystery. It awakens the intuitive nature of the feminine reproductive system and communication with the hidden realms.
7. Casaglia Blend - Enhances the poetic perspective and romance of life. It refines sensual experience and stimulates sexuality, as does Lotus.

Men's fragrances:

1. Papyrus Blend - Restores the love of adventure within life and awakens the full functioning of sexuality.
2. Arabian Nights Blend - This fragrance is deeply sensual and awakens the self-knowing of male potency. It has aphrodisiac qualities.
3. Hathor Blend - Promotes inner masculine strength and self-confidence. Creates belief in the ability to achieve.
4. Tutankhamun Blend - Dissolves stagnation of emotion and repression of the authenticity of the male expression.
5. Bedouin Nights - Awakens the feminine qualities of the male, stimulating proper flow of energy in the lower chakras. It restores the intuitive abilities of the masculine.
6. Desert Moon - This fragrance stimulates the functioning of the hidden centers that are found only in the dream body of humans. The masculine womb, a center found above the root chakra within the dream body, becomes awakened to create a feeling of self-fertilization of his dreams. It creates a feeling of being at home and confidence in self-achievement.
7. Patchouli - Patchouli is very grounding for the male tendency of over-emphasis of the electrical (mind, reason and intellect). It helps silence the dialogue of the mind so that spiritual mastery can be accomplished. Promotes deep meditation and expansiveness.

Note: There are seven men's fragrances and seven women's fragrances. They are specifically designed by Almine to balance the seven directions within the masculine and feminine. When the rose oil for women and the sandalwood oil for men have been completed in Egypt to embody the necessary frequencies as specified by her, the eight directions within polarity will be balanced and healed by these powerful products.
